## ACQUISITIONS

### NEW BOOKS

FARMING AND DEMOCRACY by A.W. Griswold. New York, Harcourt, Brace, 1943. 227 p. 281 G38.

"Farming as a family enterprise is the backbone of democracy." A.H. Andresen-Rep. Minn.

The book discusses the origin of the idea, its historic influence on public policy in Great Britain, France, and the United States, and its possible significance for the future of both American agriculture and American democracy.

FORESTRY IN GERMANY, PRESENT AND PROSPECTIVE by C.A. Schenck. New York, Newsprint Service Bureau, 1943. 42 p. 99.66 Sch2.

"Less than 40 years ago and all over the world, German forestry was acknowledged to be the leader of the forestry profession, and of the science of forestry. The several German states were vying with the other in an endeavor to increase the productivity of their woodlands and the efficiency of the staff administering them. Forest research was conducted on a grand scale. And indeed, German forestry had mastered its problem."

HARNESSING THE EARTHWORM by T.J. Barrett. Boston, Humphries. c.1947. 184 p. 436 B272H.

"A practical inquiry into soil building, soil conditioning, and plant nutrition through the action of earthworms, with instructions for intensive propagation and use of domesticated earthworms in biological soil building."

"Harnessing the Earthworm is a 'reading book' for anybody with sense enough to know that our very lives depends on saving what top-soil the globe still has, and doing all that is

possible to create conditions in which more can be made, and made more rapidly than by the hazard leisurely methods of nature, which takes from five to hundreds of thousands of years to lay down one inch of top-soil." Dorothy Canfield.

NORTH CAROLINA, A DESCRIPTION BY COUNTIES, by Bill Sharpe ed. Raleigh, Warren, 1948. 125 Sh22.

"This work, projected as a field book for persons interested in knowing something about every section of North Carolina, is a compromise between the urgency for up-to-date information and the inexorable fleeting of time." --Foreword.

OUR LIVING FORESTS, THE STORY OF THEIR PRESERVATION AND MULTIPLE USE by J.T. Hazard. Seattle, Superior Pub., Co., 1948. 302 p. 99.61 H33.

The story of America is the story of growth: heroic, epic, violent. The logging industry has certainly contributed its share. The drama of logging has been well told: the timber barons, the great dynasties, the ruthless logging and business methods; the rifling of a continent; the emergence of a great industry with world-wide significance. Yet a modern struggle as epic as any in the past has been going on within the industry. It is a struggle to bring intelligence, knowledge, order, far-sightedness to a phase of our national existence that was often intolerant of interference. Bookjacket.

The multiple use of trees and forests is the message of this book. Its author has devoted most of the years of a long life about equally to the enjoyment of trees and forests and to the complex fields of their utilization. He is firmly convinced through experience that fun in forestry works out well with its industrial and commercial use. It demands both feeling and thinking to understand and to invite forest cooperation. In no other field of natural resources are balance and tolerance more essential.

"There are seven major fields to be considered in the multiple use of our living forests: the forest industries; grazing of flocks and herds; prospecting and mining; water resources; wild life and game; recreation; rest, relaxation, and health-seeking." -- Foreword.

FARM AND GR SS SEED MANUAL. 1st ed. McCullough (J. Chas.) Seed Co. Cincinnati, 1948. 128 p. 60 u132.

Pasture grasses, common pasture weeds, fundamental cultural facts of establishing and maintaining a good turf, turf grasses, common turf pests and control, legumes and forage crops are discussed.

PAMPHLET MATERIAL

In our March Newsletter, we listed the Hoover reports that had been received in the Library. The following are additional reports. Due to the very long reserve lists, we are asking that you read them as quickly as possible so that others waiting to see them will not have to wait too long. Lets get the material to them while it is still current!

Commission on Organization of the Executive Branch of the Government Report to Congress.

1. Treasury Department.
2. Department of Interior.
3. Federal Business Enterprise.
4. Overseas Administration. Federal State Relations. Federal Research.

Task Force Reports prepared for the Commission.

1. Lending Agencies. App. R.
2. Revolving Funds and Business Enterprises of the Government. App. J.
3. Water Resources Project. App. K.
4. Natural Resources. App. L.
